Meeting ID: 838 9671 8289

Passcode: 437595

Joe Bruce will work through the steps for bending wire into articulated connectors and then demonstrate how to tie articulated two-color Bullethead Darters. This club sponsored event, free to FSFF members, is part of a continuing series of club sponsored Saturday sessions focused on hands-on demonstrations of all aspects of fly fishing.

By building an articulated connector into your flies will greatly increase the fly's action not only during your retrieve but also when the fly has paused between line strips. Join us and learn how to bend your own wire articulated connectors and then how to tie articulated flies.

During this virtual hands-on demonstration, Joe will cover the following:

- **How to use Joe's wire bender tool**
- **Bending your own wire articulated connectors, one for articulating flies and the other a connector that you can attach flies, jigs or twister tails**
- **Tying the articulated two-color Bullethead Darter**

Questions? Please contact Joe Bruce at [saltflies@comcast.net](mailto:saltflies@comcast.net). The wire bender tool and booklet are available through Joe's website at [joebruce.net](http://joebruce.net).
